February 24th – 26th, 2025

37th Course on
MICROSURGERY of the
MIDDLE EAR and
AUDITORY IMPLANTS including

hearing

6th Advanced Training
on Comprehensive
Hearing Restoration

Department of Otorhinolaryngology,
Plastic, Aesthetic and Reconstructive Head and Neck Surgery

Head: Univ.-Prof. Dr. S. Hackenberg

Dear Colleagues,

Welcome to the 37th Course on Microsurgery of the Middle Ear in Würzburg and the 6th HEARRING – Advanced training on “Comprehensive Hearing Restoration”!

Microsurgery of the middle ear is one important part of our speciality. Besides classical tympanoplasty procedures, indications and special interventions for surgical hearing restoration experienced an enormous progress by the rapid development of new prosthetic and technical devices up to cochlear implantation and implantable hearing aids.

The international association of Comprehensive Hearing Centers “HEARRING” was founded to advance the clinical and scientific exchange of experts worldwide. Integration of HEARRING experts is an important step to extend the program beyond the borders of a traditional ear school to an international level.

Enabling the possibility to participate online, the course will be organized as a hybrid course again. Thus, the lively discussions during surgery and the lectures can be extended to colleagues, who are not able to travel to our center physically.

We will offer the possibility of “blended learning” to all our participants by providing online video material and instructions prior to the course.

In collaboration with the HEARRING an online auditory implant training course for online attendees is offered. During this we will guide through the main steps of implantation of these devices in artificial temporal bones by online support.

Certainly, Würzburg offers much more than a surgical course. Take the advantage to explore Würzburg’s historical sites by visiting ancient locations and enjoy the world-famous Franconian wine.

We are looking forward to welcoming you in Würzburg or online and experiencing a scientifically and personally enriching meeting.

Program

Prior to the course: Online material provided by the **HEARRING BOOST platform**

Monday to Wednesday, February 24th to 26th, 2025

Live surgery in 3D HDTV projection: Tympanoplasty, stapesplasty, cholesteatoma surgery, cochlear and active middle ear implants, Ménière's disease surgery

Lectures: Tympanoplasty, stapesplasty, cholesteatoma surgery, cochlear implantation, active middle ear implants, bone conduction implants and acoustic neuroma surgery

HEARRING comprehensive lecture:

t.b.a.

2 days of temporal bone exercises

Day 1: Classical preparations

Day 2: HEARRING – Advanced Training on Comprehensive Hearing Restoration

Hands-on Workshop: audiology, implant, vestibular and radiological diagnostics

Thursday, February 27th, 2024, 11 a.m.

Online auditory implant training:

Participants will be informed about the details in due time before the event.
